FAITALPRO @ PROLIGHT+SOUND 2019

WE LOOK FORWARD TO SEEING YOU, HALL 8.0 BOOTH # E94

FaitalPRO, renowned Italian manufacturer of professional loudspeakers, is proud to reconfirm its presence in one of the most relevant European pro-audio events of the year. As usual FaitalPRO is not coming empty handed, offering a whole family of woofers as well as 2 new XL woofers and a 1.4" compression driver to top things off.

New 12, 15 and 18 inch FX Woofers: 12FX600, 15FX600, 18FX600

The PRO Audio industry is evolving at an incredible rate and the products requested by today's PRO Audio market need to be more powerful, lightweight and highly efficient. In response to this, the FaitalPRO team designed and built a range of neodymium speakers capable of combining extreme characteristics such as power, efficiency and reduced weight while maintaining the level of reliability that FaitalPRO's users have become accustomed to. The result of the study that was carried out by FaitalPRO's R&D team is now here.

New 12 and 15 inch XL Subwoofers: 12XL1200, 15XL1200

FaitalPRO proudly presents the latest in the XL range. These two significant models have earnt their place in the "Xtra Large" rankings thanks to their outstanding features. These resistant neodymium high power drivers have been coupled with an extremely efficient venting system allowing them to harness great power in a tight space. This characteristic makes them the ideal solution for high power compact systems. They're definitely born to leave their mark.

New HF1440 Compression Driver

The HF1440 is an exceptional high-power compression driver that enters the FaitalPRO catalogue as a top of the range product. This neodymium "jewel" will amaze and please, offering hi-level performance in surprisingly contained dimensions. Its magnetic field guarantees optimum control over the dedicated annular diaphragm even at low frequencies. The combination of these elements gives a smooth response over a wide frequency range offering more solutions to acoustic designers. It's a perfect choice for the new generation of high-power line arrays giving a consistent natural sound.
